

EVOLVING WORK

Work Forward recognizes the dynamic relationships between ACTIVITIES and the WHO, WHAT, WHERE, WHEN, WHY, AND HOW elements of work. Work Forward shares, explores, and experiments to help identify emerging ways to evolve and improve work.

WORK FORWARD

Change is constant. Advances in technology and increasing complexity have not been accompanied by the tools, systems and techniques that enable us to use them effectively.

Work Forward examines the relationships each of us have with the ever-changing world of work in order to identify opportunities to improve work experience and create competitive advantage. By exploring how the components, activities, and dynamics of work influence and support each other, Work Forward offers practical solutions for today.
